95 ergonomics
Looking at our world today, it is clearly time to acknowledge the fundamental importance of nature in our lives, and to take responsibility for our ecological footprint. It is time to prioritise lasting value – and to treat nature and our fellow humans with respect. We manufacture products with a long functional and aesthetic lifespan. We actively support climate protection thanks to our decision to manufacture durable kitchens and furniture from natural, renewable raw materials in an environmentally sustainable way.

At TEAM 7, sustainability and environmental protection have been at the heart of everything we do for decades. Because we are a part of nature, and how we interact with it is a deciding factor for our future.

The forests in which the trees for our kitchens grow play an important role as durable carbon storers. One cubic metre of wood binds the carbon from around one tonne of CO₂. We then use this wood to make kitchens, which in turn store the bound carbon for a long time. While this is happening, the next trees start growing and extracting CO₂ from our atmosphere. Like good wine, we give our wood time to mature, to develop the qualities we value by letting it dry for up to two years. Wood is also naturally accustomed to all sorts of challenges – it is extremely robust. This makes our kitchens durable, stable in value and especially easy to care for. Even small dents and scratches can be repaired and the traces of many years of use can be removed. In this way, our kitchens retain their natural beauty for decades.

"Our commitment to nature and to our values shapes everything we do.
Dr Georg Emprechtinger,
CEO and owner of TEAM 7"

The forests in which the trees for our kitchens grow play an important role as durable carbon storers. One cubic metre of wood binds the carbon from around one tonne of CO₂. We then use this wood to make kitchens, which in turn store the bound carbon for a long time. While this is happening, the next trees start growing and extracting CO₂ from our atmosphere. Like good wine, we give our wood time to mature, to develop the qualities we value by letting it dry for up to two years. Wood is also naturally accustomed to all sorts of challenges – it is extremely robust. This makes our kitchens durable, stable in value and especially easy to care for. Even small dents and scratches can be repaired and the traces of many years of use can be removed. In this way, our kitchens retain their natural beauty for decades.
WE WERE ALREADY ECO BEFORE IT WAS COOL

Back in the early 1980s, we decided to consistently follow “green” principles and convert our production completely to wood from sustainable forestry. This commitment to nature and our values shapes everything we do. We have set ourselves strict guidelines: only by living responsibly and sustainably can we preserve the fundamentals of life for future generations. We always consider both the human aspect and nature itself when producing our kitchens. Careful use of resources has already been part of our everyday production methods for several decades. So we place great emphasis on ecological and sustainable production.

FROM THE FOREST TO THE FINISHED KITCHEN: IT’S IN OUR HANDS

Our sustainably managed forest is located in the immediate vicinity of our plants in Upper Austria. This is also where the entire production process for our kitchens takes place: from the natural method we use to dry the wood, to making the solid wood panels, right through to the final skilled carpentry by our traditionally trained craftsmen. It means we can guarantee high standards and environmentally friendly production. Made in Austria.
REAL CRAFTSMANSHIP

Every TEAM 7 kitchen is unique – hand built in our workshop by experienced joiners using Austrian artisan craftsmanship. Their knowledge and skill are based on a tradition that goes back generations: starting with the choice of wood and the correct way of storing, to the careful processing that does justice to the living wood. Hand-sorted wooden surfaces, high-quality wood joints and handcrafted details that can only be achieved in this way using real solid wood, testify to the high quality of our products. Not only do we create kitchens, we also create lasting value.

THE LATEST TECHNOLOGY

At our plants, we combine the knowledge of our joiners with ultramodern technology for processing wood. For us, these two things go together. Because we want precision down to the detail and this is achieved by combining technology and tradition. Even though we work with the most precise machines, the final touches are always completed by human hands. This is apparent in our kitchens.

PREMIUM QUALITY

Elements and drawers made from real solid wood make our kitchens extremely strong and enormously resilient. We guarantee the highest production standards, with constant quality checks and much of the work completed by hand.

DISCOVER TEAM 7 KITCHEN WORLDS ONLINE

In our virtual kitchen studio, you can experience the various design styles of our kitchens up close and discover the planning diversity of our kitchen range. The perfect inspiration to help you create your dream kitchen!

PERSONALISED PLANNING

We plan each and every one of our kitchens precisely to your specifications. A wide choice of wood types, materials, handles and modern cabinet fittings for the interior open up a broad range of design options. We can adjust heights, widths and depths* to the nearest millimetre – and even create bespoke designs. In our kitchen checklist, you can find basic questions on how to plan your own personal kitchen. This checklist provides the perfect foundation for a consultation with our TEAM 7 partners!

*excluding wardrobes and functional fittings
A longing for things that are genuine is inherent to human nature. We can only feel things fully with all our senses when they are real. The open-pore, living wood of our kitchens has the unique ability to move us with its feel, beauty and scent. That’s why we do everything we can to bring wood and its authentic characteristics into your home. Experience what we mean by “cooking with all the senses” and in tune with nature.

PURE SOLID WOOD

Our kitchens are crafted from pure solid wood, which creates a healthy cooking environment. That’s no surprise – after all, the trees themselves come from healthy forests. Nurtered for decades in sustainable forestry, we process the wood with the greatest of care – and from the very outset. The choice of wood type is decisive for the later quality of our kitchens. Genuine, open-pore wood brings comfort and warmth into your home. It breathes, absorbs humidity and releases it again when the air is dry. This creates a noticeably more pleasant atmosphere in the room. Wood also has a natural anti-static and anti-bacterial effect.

To ensure we preserve these qualities, we process this superb natural material in its purest form. This is why the TEAM 7 promise applies to the manufacturing of all our kitchens: pure solid hardwood from sustainable forestry, assembled without formaldehyde, finished with natural oil – and that’s it! This is how we make sure the wood remains free of harmful substances and retains its wonderful properties.

ULTRAMODERN THREE-LAYER TECHNOLOGY

Even the high-quality three-layer solid wood panels are made to order for our kitchens in our board factory. Three layers of the finest hardwood are glued together transversely. This technology preserves the naturalness and the original strength of the wood. At the same time it provides the boards we use for the fronts in our kitchens with a tremendous structural stability. This opens up new possibilities for unique designs and functionality.
When architecture, design and materials blend into one, the result is a place of absolute enjoyment. Kitchens with clear lines and minimalist design emphasise elegance in the living space. They combine simplicity and functionality in a sophisticated way. Large fronts – both dark and light – as well as the play of geometric fronts give the room clarity and a timeless aesthetic.
The echt.zeit kitchen creates a place of shared experience and enjoyable moments. It’s all about returning to essential values, such as fresh, natural ingredients and traditional craftsmanship, as well as a new cooking culture and experiencing the comfort of home. High-quality ceramic brings a striking elegance to the kitchen, while the finest hardwood adds a warm and cozy touch.
In the *echt.zeit* kitchen, TEAM 7’s passion for true craftsmanship and solid wood expertise becomes apparent. The vertical millings of the *echt.zeit* fronts create a fascinating depth effect that can only be achieved with solid wood. With its impressive material thickness and striking appearance, the open shelf unit brings the powerful beauty of real solid wood into the kitchen.

Find out more about the *echt.zeit* kitchen!
qr.team7-home.com/echt-zeit-kitchen-walnut
It is the appealing interplay of wood and ceramic that makes this echt.zeit kitchen so intriguing. Elements of living solid wood repeatedly break up the dark, minimalist surfaces, creating a very special balance of materials. Flexible drawer dividers made from fast-growing bast fibres and the new light bridge for growing fresh herbs reinforce the philosophy behind the echt.zeit kitchen.
Refinement and finesse along with natural materials, wood and ceramic, dictate the design of the filigno kitchen, which playfully creates a flowing transition from the kitchen to the living-dining area.
Defining features of the filigno kitchen include a delicate casing of solid wood panels only 12 mm thick, manufactured using ultra-modern three-layer technology. Handleless fronts emphasise the minimalist design and the precision of the workmanship.

fig. filigno kitchen, wood type oak white oil, phedra ceramic
Retractable hinged doors, behind which additional storage surfaces and built-in appliances are concealed, create a purist look in next to no time, while alcove units with dimmable LED lighting set exciting accents. Ingenious detail: a pull-along makes it easy to open the top inner drawer behind fronts spanning the full height of the element.

qr.team7-home.com/filigno-kitchenvideo
In the black line kitchen, the cool elegance of black surfaces meets the natural beauty and warmth of the finest solid wood. The generous add-on table and the open plan of the kitchen create an especially cozy atmosphere.
black line

Coloured glass, matt black handles and plinth panels are the key ingredients in the black line kitchen’s elegance. An integrated extendable table provides additional storage space in next to no time. Ergonomically shaped handle profiles impress with their ease of use.

fig. black line kitchen, wood type walnut, matt black glass, smoked glass | ark bar stool, wood type walnut, fabric Clara 188 (seat shell) and black leather (piping)
Flexible design elements allow for detailed refinement of your kitchen design. Optional open or closed styles can provide spaces for decorative accessories or kitchen utensils, which can be beautifully positioned behind smoked doors.

Find out more about the black line kitchen!
qr.team7-home.com/black-line-kitchen-video
The centrepiece of the k7 kitchen is the height-adjustable kitchen island unit, which ensures first-class comfort. It is also in a class of its own visually: here, the kitchen island impresses with the continuous wood pattern of the hand-sorted fronts.

ULTIMATE COMFORT
Whether table, bar or work surface: the worktop of the K7 kitchen island can always be adjusted precisely to individual ergonomic requirements via a flush-mounted control switch. The lifting technology, patented by TEAM 7 and globally unique, operates almost silently.

fig. K7 kitchen, wood type walnut, matt bronze glass.
The flush-fitted \textit{k7} pull handle is seamlessly integrated into the metal profile on the cupboard fronts and only reveals itself in use. Solid wood inside the kitchen cabinets emphasises the high-quality workmanship and ensures maximum stability.

Farmer’s markets are great sources of inspiration. They offer us regional specialities and invite us to discover new things. Their fascinating range gives free rein to our individuality. Just like our kitchens that provide almost infinite scope for individualised planning in every size and style. From the compact kitchen for small city flats to the spacious kitchen-living area – everything is possible here.
Our Linea kitchen offers a wide range of design options: from a simple kitchenette to a kitchen-living area with an island feature – it can be perfectly adjusted to your requirements.
A versatile shelf system creates the perfect transition into other living areas and provides a place for your useful and beautiful things – ideal for open-plan living areas. Clever additions such as concealed switches and sockets complete this modern kitchen design.

Fig.: linee kitchen, wood type oak, matt medium grey glass ark for steel, wood type oak, fabric Clara 2 188 (seat shell) and black leather piping.

Find out more about the linee kitchen!
linee-kitchen-video
Numerous innovative design details add to your comfort and unrestricted enjoyment when cooking in the Linee kitchen. Ultramodern features allow storage space to be used to its full potential and guarantee well-organised contents which can be seen easily.
From classic to modern: the linee kitchen offers the perfect solution for every space situation. This kitchen is not only incredibly versatile, it also comes in many different guises. This is because different handles and a wide range of front versions enable a lot of creative freedom in the design.
Larger fronts for base cabinets with sliding doors and practical shelving elements add variety to the kitchen design. Drawer dividers can be combined in different widths and depths, giving all utensils enough room.

Fig. Linee kitchen, wood type walnut, matt pebble glass.
This combination of wood and ceramic gives the cera line a distinctive style with a delightfully warm and cozy character. It turns the kitchen into a place of inspiration where cooking becomes a pleasure. Everything is perfectly coordinated, natural materials in a timeless design with ultramodern features.
Generous use of the natural material ceramic is the defining feature of the cera line. The striking bar handle made of real solid wood in a solid material thickness makes for an exciting contrast. An aluminium version with stainless steel finish offers additional design options.

fig. cera line kitchen, wood type oak white oil, cement (fronts) and basalt black (worktop) ceramic | ark bar stool, wood type oak white oil, anthracite (seat shell) and white piping leather
The **FIRST CHOICE** originates from the **kitchen range**: it has the same quality, the same appearance, and uses the same wood types. Only the range of options is different, limited to selected cabinets and handle styles. This makes the **FIRST CHOICE** an attractive TEAM 7 entry-level kitchen – ideal for first-timers.
Nifty U-shaped shelves that offer a decorative place for your herbs and spices bring charming and modern freshness into this kitchen. Practical and concealed outlets on the underside of the counter offer smart functionality.

fig. 14 kitchen, wood type alder, matt white glass | bar stool, wood type alder, anthracite (seat shell) and white piping/leather
Feel nature, enjoy the scent of wood, celebrate freedom and recharge your batteries: walking through the forest moves our senses – it does us good. Experiencing real wood with all the senses is also at the heart of these kitchens. The generous use of solid wood brings the beauty and unique physicality of this natural material into your home – for an ambience full of warmth and security.
The echt.zeit kitchen presents solid wood in its most attractive form, combining sustainable quality with superior functionality. Thematically well thought-out cooking areas that meet versatile requirements guarantee unrestricted enjoyment while cooking.
You will find space for crockery, herbs and more on the open shelf with optional LED light strip. It can be planned as a solo piece standing up against the wall, as a room dividers, or as part of a medium-height or tall cabinet. Innovative solid wood panels, manufactured with ultramodern three-layer technology, make it possible to create bars, counters and add-on tables with an impressive material thickness and a length of up to 280 cm – in one piece.
With its ingenious arrangement of areas for washing up, cooking, preparing and eating food, all four sides of the echt.zeit kitchen island can be used at the same time. This encourages people to come together to experience and enjoy special moments. The different heights of the individual areas ensure ergonomically correct working. Pull-out shelves make it easy to operate kitchen appliances and a knife drawer with a magnetic wooden strip allows kitchen knives to be stored in a clear and blade-friendly way.
The loft kitchen is the modern country-style kitchen for those who love wood, enjoy cooking, and appreciate authentic craftsmanship and natural materials. Here, its design impresses both due to the vibrant aura of wood and the loving details of traditional production techniques.
The open design style gives the loft kitchen a particularly cosy atmosphere while offering a perfectly planned environment for enjoyable cooking. From simple kitchenette to luxurious kitchen-living area with an island unit, loft offers optimal solutions for widely varying needs and living spaces.

fig. loft kitchen, wood type wild walnut, smoked glass.

Find out more about the loft kitchen!
qr.team7-home.com/loft-kitchen-video
Urban or rural, modern or classic: the loft kitchen combines supposed opposites with clear lines, subtle edge profile and lovingly crafted details. For an even brighter, more vibrant feel, consider ordering your kitchen in wild oak or wild walnut.
To create the perfect dining area and a place for the whole family to gather, the loft kitchen can be combined with an add-on table that impresses with its material thickness. The ark bar stool is a stylish companion. It is available in two seat heights and with two backrests of different heights and offers pleasant seating comfort.

fig. left: loft kitchen, wood type wild oak white oil | ark bar stool, wood type oak white oil, black (seat shell) and taupe (piping) leather

seat height 80 cm
seat height 67 cm
Functional details and open storage space make finding cooking utensils easier and help things flow smoothly during cooking. The practical ceiling-mounted storage with optional LED lighting keeps all kitchen gadgets within easy reach and sets accents at the same time. Interior drawers made of solid wood provide clear storage space behind fronts which span the full height of the element.
The design of the rondo kitchen plays with traditional elements of style. At its heart are craftsmanship and the natural characteristics of wood. Open shelves, cornices and the gently rounded edges discreetly emphasise its country cottage character. The emphasis here is placed on manageability and functionality.
Lovingly crafted alcove elements in solid wood and the elegant bottle rack complete the charming appearance of the rondo kitchen. Generous storage space for kitchen gadgets and other utensils can be concealed behind the roll door of the top cabinet. To keep your hands free for cooking, there is a practical stand for your cookbook or tablet.

Fig.: rondo kitchen, woodtype beech heartwood, clear glass.
And just as in cooking, the individual design of your kitchen is all about the ingredients. Because every cook has their own style, uses different utensils and has special storage needs. So the kitchen should be carefully tailored to suit the users’ needs. Our solid wood kitchens are individually planned and custom-made to order. This allows us to adapt the kitchen perfectly to suit individual ergonomic and architectural requirements.

SELECT YOUR INGREDIENTS!

MATERIALS

The materials for our kitchens have to be just like our wood: natural, genuine, and sustainable. This guarantees a healthy environment for preparing your food.

HANDLES

The finishing touch for every TEAM 7 kitchen is choosing the right type of handles. Whether profile handle, bar handle or without a handle – functionality and aesthetics combine to make a statement that gives every kitchen its own personal touch.

profile handles

GPS profile handle black stainless steel finish

GPE profile handle stainless steel finish

FG strip handle flush stainless steel finish

PG pull handle stainless steel finish

bar handles

MGS metal handle black stainless steel finish

MG metal handle stainless steel finish

SEF bar handle stainless steel finish

SEN bar handle wood wood types: beech, oak, walnut

GRU cubic bar handle stainless steel finish

GR round handle stainless steel

EF round bar handle 12 mm stainless steel finish

without handles

OFU handle groove in stainless steel finish

AP-SD, AP-TD Servo Drive (electric) or touch mechanism (mechanical)
DRAWER ORGANISATION

Ingenious accessories create order with a system. Width and depth of the drawer divisions can be combined flexibly and extended at any time. They use every nook and cranny and also store all the supplies hygienically and safely.

**pro**

The combination with aluminium gives this interior a particularly elegant appearance.

**OrganiQ**

In neutral black, the modules made of renewable bast fibres match any wood type.

**move**

The elements of this drawer divider are made entirely from pure solid wood.
STORAGE SOLUTIONS

Not a centimetre is wasted here: custom-made features make cooking a pleasure. With our storage solutions, your ingredients and cooking utensils are always within easy reach. A practical divider for baking trays makes it easy to store and handle these bulky baking utensils. Order and a clear overview are as important as ergonomics here.

chrome interior
A metal railing in shiny chrome frames the elements of this interior.

anthracite interior
For this system of anthracite-coloured metal, the front and railing can be chosen in solid wood to match the element wood type.

baking tray divider, base cabinets with functional fittings or interior drawers

wall cabinets with flip top system, upper cabinets with a roll door

tall cabinets with retractable hinged doors or functional fittings, wine cooler front
LIGHTING

Thughtfully designed lighting systems ensure that your kitchen is brightly lit and has a pleasant ambience: bright light for working and atmospheric light for enjoyable moments. Our LED lighting systems are dimmable and available in two light colours, cool white and warm white.

LED spot square
also available
in matt black.

light bridge
The light bridge in matt black is both a design element and a light source. Its light colour is adjustable and can mimic daylight – in combination with our waterproof black metal boxes, ideal for growing fresh herbs.
SINKS, ALCOVE SYSTEM, WASTE SORTING

The specially designed undersink cabinet creates space for modern water treatment systems that dispense boiling, cold or fizzy water directly from the tap. Hanging or free-standing, the versatile alcove elements offer space for cooking utensils, herbs or a knife block. Innovative waste separation systems in your kitchen ensure cleanliness and order. To ensure that the waste heat from built-in appliances can escape easily, optional ventilation grids can be planned into the top board.
ADD-ON TABLES, BREAKFAST BARS, COUNTERS

A range of breakfast bars, counters and add-on tables transform your kitchen into a popular meeting place to have breakfast or snacks together. Practical connections also open up smart application possibilities for getting small tasks done when working from home. Our matching bar stools and chairs provide first-class seating comfort.
ERGONOMICS

Ergonomics has the highest priority in TEAM 7 solid wood kitchens. Individualised layout options and the fact that every order is custom made means we can fit your kitchen perfectly to your ergonomic needs.

You will find the different front and element dimensions of our cabinet types at www.team7-home.com in the kitchen area.

counter-bar heights

For a comfortable sitting position, set the bar height approximately 30 cm above the seat height of your bar stool.

counter height chart

Find your ergonomically optimal working height by bending your elbows to 90 degrees and measuring 15 cm downwards.

k7 kitchen island

Most comfortable working conditions for every activity – thanks to the infinitely height-adjustable worktop.

Source: AMK
simple day-to-day care

Our solid wood kitchens are not only pleasant to the touch – they also hold up well with daily use. Day-to-day cleaning just needs a dry or slightly damp cotton cloth.

product care and repair

The open-pore finish of our wooden surfaces means small dents and scratches are easy to treat. Even the traces of many years of use can be removed: sand down, apply oil, and you’re done.

room climate

Solid wood furniture feels most comfortable at a constant humidity level of between 40% and 60%, and a room temperature of between 18° and 23° Celsius – just like us humans. You can find more information about the material-typical properties of our solid wood kitchens in our Service Certificate.

ecolabel

The Austrian Ecolabel verifies that the wood we use comes from sustainable forestry and contributes to a healthy living environment due to its special surface treatment. It is also a mark of high-quality products that excel in durability, serviceability, as well as safety and comfort in daily use.

ISO, EMAS, GS

The EMAS certificate is proof of our sustainable production, efficient use of resources and that we comply with the applicable environmental laws. As an ISO-certified company, we stand for the implementation of internationally applicable standards in the areas of environment, quality, and safety. In addition, the entire element system is GS-certified (“Tested Safety”).

test lab

This means that, even in the development phase, we test the function, ergonomics, stability, and safety of our products comprehensively in our own laboratory; over thousands of cycles. TEAM 7 offers only custom-made kitchens – with technology and function that has been perfected.

conserving resources

Purchasing with the right attitude. Contrary to the current trends toward global sourcing, we have always relied on regional partners and suppliers. This ensures short transport routes and avoids unnecessary emissions of harmful substances. Plus, our regional, carefully selected supplier network means more flexibility for our customers. This not only protects nature, it also preserves our independence.

THE UNIQUE QUALITIES OF WOOD INSPIRE US TO CREATE KITCHENS THAT ARE EQUALLY UNIQUE.

- it’s a tree story.
CO₂-NEUTRAL ENERGY GENERATION.
The scraps of wood accumulated from production are used in the company’s own furnaces for heat production, making us completely energy self-sufficient. Since wood is biomass, no more CO₂ is released during combustion than that which the trees have withdrawn from the atmosphere during their growth. This enables a CO₂-neutral energy generation.

NATURE SUPPLIES US WITH IDEAS AND ENERGY.
We purchase 100% green electricity for our production facilities. What is more, our photovoltaic power plant generates 390,000 kWh per year. That covers the annual electricity consumption of over 85 average Austrian households.

CONSUME LESS, CREATE MORE.
Thanks to targeted energy-saving projects, such as an intelligent light control, new ventilation or efficient heat recovery systems, we have reduced our annual total energy consumption from 14.8 million kWh to 12.8 million kWh since 2012. We have simultaneously been able to improve manufacturing efficiency.

CONSERVATION OF RESOURCES

SUCCESSFUL PACKAGING.
When packaging our furniture, we avoid plastics and instead use cardboard from recycled waste paper, custom-fitted to the piece we are packing. This preserves resources, saves on padding and provides the best possible protection in transit.

SUSTAINABLE PACKAGES.
When packaging our furniture, we avoid plastics and instead use cardboard from recycled waste paper, custom-fitted to the piece we are packing. This preserves resources, saves on padding and provides the best possible protection in transit.

OVER THE NEXT GENERATIONS, THE SOLID WOOD FURNITURE WE PRODUCE EVERY YEAR WILL BIND 6,000 t CO₂

THE PURCHASE OF GREEN ELECTRICITY COMBINED WITH OUR PHOTOVOLTAIC SYSTEM SPARE THE ATMOSPHERE ANNUALLY

DURABLE FURNITURE FROM NATURAL MATERIALS.
Treated wood surfaces can easily be repaired and covers reupholstered. This transforms our furniture into loyal companions for many years to come. All our furniture is manufactured in such a way that it can be returned to the natural cycle at any time.
